NEEDHAM, Jan. 31, 1872.

## REPORT OF THE SELECTMEN.

---

### *To the citizens of Needham :*

In compliance with a vote of the town, we respectfully submit to you the following statement of its affairs, which have come under the supervision of this Board, during the past year.

The extensive improvements ordered by the county commissioners, and those voted by the town, have considerably increased the debt of the town.

The promise of its increased wealth and population, is auspicious; and it is to be hoped that a generous spirit may pervade the public mind. A town growing as rapidly as ours, requires liberal expenditures in its various needs, but they should be wisely and carefully undertaken, and should be limited within the amounts appropriated for the several departments, or special purposes, if possible.

We would suggest, for the consideration of our citizens, whether the town will not be benefited by increasing the Board of Selectmen to five members, instead of three, and electing the same five persons as the Board of Assessors.

### HIGHWAYS.

The town has had the services of efficient highway surveyors during the past year. Our roads have been greatly improved within a few years, but there is opportunity for larger improvement, and this should be accomplished as rapidly as possible. Attention should be directed especially to our principal highways, and to the main thoroughfares of travel, offering additional attractions to the residents of an over-crowded metropolis, who are seeking pleasant and convenient homes in the suburbs.

### PERMANENT IMPROVEMENTS.

The arched culvert under Central street, near Lake crossing, has been rebuilt in a substantial manner, in accord-

ance with the plans drawn by J. Franklin Fuller, civil engineer, and in pursuance of the vote of the town at its last annual meeting. Messrs. Johnson & Richmond contracted to do the masonry of this culvert at  $5,33\frac{1}{3}$  per perch, including the excavating pumping and bailing, cofferdam and wood-work on which to spring arch, and assuming all damages, if any happening, to the Boston & Albany Railroad Corporation, or its property, in connecting the same with the arch under the railroad, and other damages and risks. Much difficulty was experienced in obtaining stone for this culvert; and in consequence, the cost has been somewhat increased. Three different parties failed to fulfil their agreements for furnishing stone; and the quarry at Framingham Centre, from whence stone heretofore has always been obtainable, offered none that appeared suitable for this purpose.

The Boston & Albany Railroad Company were applied to for material sufficient to complete the stone-work, but a large order for stone for a culvert for their own road prevented the delivery; and our contractors were instructed finally to send men to Braggville and Natick, and quarry there sufficient material for the completion of the undertaking.

In the construction of this culvert, the stone were laid so as to bind in the walls, and the intervening spaces were filled compactly with concrete composed of sand, gravel, and cement, rough stone of various dimensions being advantageously worked into the same. Although a large quantity of cement was used, there was a saving to the town by the substitution of this concrete in the place of other material. The gravel for filling and grading was procured from the adjacent land of Messrs. E. M. Wood and Horace Humphrey, who also materially aided the town in freight contracts for the transportation of stone.

The arched culvert is an expensive improvement, but one which has long been imperatively needed. The structure is the most substantial of its kind in the town, and, it is hoped, will justify the expenditure.

The county commissioners have ordered the widening of this street (Central turnpike), and that should be done at once, to the end that the full benefit of the expenditures at the culvert may be realized. Two thousand and five hundred dollars will be required to carry out this order of the county commissioners.

The widening and grading the highway, commencing at the corner of W. F. Norcross' estate and running to the Boston & Albany Railroad, has been completed by the surveyor of the

North district, in a thorough manner, and is a credit to the town, and those who had supervision over and executed the work. Your Board conferred with Mr. Harris, civil engineer to determine whether it was expedient to procure a survey and plan of this road, and to have the widening and grading contracted for, but decided not to do the work by contract, and entrusted it to the supervision of the surveyor of the district.

#### NEW HIGHWAY TO DEDHAM.

Proposals for this work were solicited and advertised for extensively, and a number were sent in, varying from six thousand and seventy-six dollars and forty cents, to fifteen thousand dollars, for grading the road and putting in culverts. Mr. Charles Linnehan, an experienced road builder, secured the contract; his proposal, ten thousand five hundred dollars (\$10,500) appearing the most advantageous for the town. He made rapid progress with the work after the contract was signed, and as soon as the frost leaves the ground, he will proceed in its completion.

The contractor for building the abutments to the Charles-river bridge has not completed his undertaking, and it may become necessary for the town to finish the work.

Before commencing the several expensive improvements, the Board were unceasing in their endeavors to get proposals and estimates from contractors; and it is to be regretted that none of the large contracts were taken by any of our citizens, none of whom (except for filling over the arched culvert) presented proposals so low as those from parties out of town.

#### HIGHWAY BOUNDARIES.

Our highways are encroached upon in many localities in the town by fences erected by abutters, regardless of proper limits. We would remind the town of the importance of having the boundaries of all streets in thickly settled districts defined by permanent monuments of stone, indicating the extent of its streets and highways.

#### ALMSHOUSE.

Two years of drought, and the payment of claims contracted previous to Feb. 1, '71, amounting to several hundreds of dollars, have increased the cost and outlay appertaining to

the almshouse. Your Board believe it would be for the financial interest of the town to change the manner of working and managing the farm. Perhaps vegetables, plants, etc., can be grown there, transported to Boston for market by its teams (which, returning, may bring supplies and compost) with more profitable results than at present obtained.

In closing, we would call the attention of the tax-payers to the importance of attending the annual town meeting, at which appropriations for the year are made. It is the duty of every citizen, as well as his personal concern, to aid in providing for the judicious and economical disbursements of the public moneys.

We append a tabular statement of the appropriations and expenditures during the past year, and also of the deficiencies and unexpended balances in respect thereto, together with recommendations of appropriations for the current year.

CHARLES H. DEWING,  
GEORGE SPRING,  
EDMUND M. WOOD,

REPORT  
OF THE  
SCHOOL COMMITTEE  
OF THE  
TOWN OF NEEDHAM,  
FOR THE YEAR  
1871-72.

---

BOSTON:  
ALFRED MUDGE & SON, PRINTERS, 34 SCHOOL STREET.  
1872.

## R E P O R T .

---

At the close of another year, the Comitétee express the hope that it has not been altogether without progress, although what remains unaccomplished is so much that the advance seems of necessity small. It becomes more apparent, that seventeen schools, so widely separated for the most part from each other, cannot be efficiently overlooked by a Comitétee without a sacrifice of time and an expenditure of labor which the town has no right to expect, and which it certainly cannot obtain. Thus it has been no small tax upon the Comitétee to provide new teachers necessary to meet the frequent changes, to follow these teachers in bringing their work into order, to attend to the numerous cases of absence, insubordination, etc., which were referred to them, and to provide for the material wants of the schools, such as fuel, repairs, etc. Add to this, that the members of the Comitétee live at distances from one to three or four miles apart, and have therefore but little opportunity of coming together, except at the monthly meetings, which are wholly taken up with details of business. From all these things, it will be readily seen; that there has been but little opportunity to act with reference to intelligent and connected gradings of the schools, or to the investigation and application of the latest and best methods of teaching, of selecting text-books, of securing regular attendance, etc., etc. While, therefore, the Comitétee are fully sensible of their short comings, they may be permitted to doubt whether other citizens would have accomplished more in their places. In fact, what was suggested last year becomes more imperative, — that there should be a paid superintendent,

who would find ample employment for all his time, and, if a suitable man, would well repay the town for the outlay; and the Committee would still have quite enough to do in deciding questions which would come before them.

No new school-houses have been built during the year. The buildings at Wellesley, the Plain, Highlandville, and the Upper Falls, seem to be quite satisfactory, and those districts are well provided for. The state of things in this respect, at Grantville and the Lower Falls, seems to be somewhat unsettled. No use has yet been made of the appropriation for Grantville. At the March meeting of last year, the school committee were appointed also a building committee, to decide upon a situation, and to erect a building at the Lower Falls. This appointment was made in the absence, and without the concurrence, of at least a part of the Committee, who considered that the superintending of schools was a wholly different matter from erecting buildings; and as they were not disposed to assume that further and separate responsibility, the subject stands in abeyance, and open to the further action of the town.

It will be remembered, that an appropriation was made at the same time for removing the old school-house at the Plains, and establishing it in the Greendale district, towards Dedham. As usual, this proved more expensive than was expected, and the appropriation has been exhausted while the building is still unfinished. It seems to be much larger than is called for by the school requirements of the neighborhood, and the parties to be benefited do not seem to manifest a very active interest in the result. The Committee are informed, that the building can probably be sold for a price which would nearly or quite reimburse the town.

The financial question is another, which calls the attention for the ensuing year. The appropriation for the last two years has been \$10,000. Of this, fully \$7,500 have been absorbed in the payment of teachers, although the salaries paid are so small as to make it difficult to sustain competition

with the neighboring towns. There remains, then, less than one hundred and fifty dollars per school for care of buildings, fuel and incidental expenses.

What has been said as to superintendence, will be greatly strengthened when we come to take a general review of the schools. The fundamental and crying evil is that of irregularity of attendance. This the Committee confess their incompetency to deal with, nor, upon application to the Secretary of the State board of education, has he been able to suggest any very practical remedy. Considering that the number of persons in Massachusetts who cannot read and write is greatly on the increase, it is of the utmost importance that every town should protect itself in this respect. Doubtless there are many cases where poverty and sickness render absence unavoidable, but there are also very many where indulgence or carelessness on the part of parents, and truancy on the part of children, are the cause of fault. Very often, too, a mere short-sighted and selfish desire to earn money by children's work, interferes with school attendance. The Committee have reason to believe, that the laws of the State relative to the employment of children in manufactories, are extensively violated in the town. That the Committee should undertake the investigation in individual cases, and incur the odium of putting the laws in force, is out of the question; but a paid superintendent, who should join with his other functions those of a truant officer, might accomplish a great deal.

As far, however, as the schools themselves are concerned, the protection against the evils of absence and irregularity of studies, must be internal. The defects alluded to in the last report still exist: classes badly graded, a part of each being far in advance and another part as badly in arrear, while promotion is still mainly the result of lapse of time. Periodical examinations, with assignment in class and rank in accordance as closely as possible with regular attendance, industry, and attainment, seem to offer the only method of meeting these evils.

The Committee are not, however, entirely in accord upon this point, and if they were, the details of arrangement would, in addition to their present duties, make greater demands upon their time than they are able to afford. It would be obviously unfair to apply to any one school a set of requirements which was not enforced in the others. One obstacle to a general system is also apparent in the different stages of progress in schools nominally of the same grade. Uniformity, and an effective emulation, can only be established through a general superintendent giving his whole time to the business.

#### PRIMARY SCHOOLS.

These continue, in the course of nature, to fill up very rapidly. In the Hunnewell, at Wellesley, the number of names on the register, (seventy-four), has compelled the Committee to provide an assistant. The progress is on the whole satisfactory. The schools at Wellesley, Highlandville, and the Upper Falls being perhaps entitled to especial mention.

#### GRAMMAR SCHOOLS

have been, during the past year, the objects of much care; and in one of these, that at Wellesley, under the charge of Miss Cameron, not only in its relation to the other schools, but especially in the change effected during the year, there is cause for much gratification. The North school, that at Highlandville, and, considering the difficulties under which it labors from irregularity of attendance, that at the Upper Falls, continue to maintain their standing.

#### HIGH SCHOOLS.

It is in relation to these more particularly, that the Committee feel that the labors of the year have not been without result that practical facilities are now offered for the attainment of a

higher education. They have improved at once as to discipline, deportment, and earnestness of application. As intimated in the last report, an effort has been made, in part, to reduce the standard of requirement; and arithmetic, grammar, and spelling have been included in the studies of the lower class. This is especially the case with the East High school, where, while the number of scholars is greater, they are for the most part younger than in the West. The Committee consider themselves fortunate in both cases, as far as relates to teachers. The main thing which is now wanting to success, is a system of frequent and rigid examinations, with advancement in accordance with merit.

It is, though unavoidable, a disadvantage there should be two schools of this grade. If the whole number of scholars could be combined in one school, with but one expenditure for apparatus, etc., much better results could be obtained. The means of communication, however, render this out of the question at present. Many things in the way of chemical and scientific apparatus and musical instruments, are needed in both schools; but the Committee have been unable to procure them owing to deficiency of funds.

If in what has been written there seems to be too much of criticism and fault-finding, it is that the Committee are in a position to see better than any one else the magnitude of the task which is before them. They dwell upon it only as an apology for not accomplishing more.

For the Committee,  
 GAMALIEL BRADFORD,  
*Chairman.*

GRANTVILLE, Feb., 1872.
